Art Unit: 3634

A new non-final action addressing the claims is herein attached.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 11-13, and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Hodge et al. Hodge et al. disclose a chair control comprising a main frame (36, 70, 74) having a stop (the portion which allows limited rotation of elements such as the seat and back), a back bracket (32, 34, 38, and 40) pivotally mounted to the main frame, a seat plate (702) which is pivotally mounted and slidingly mounted independently with respect to the back bracket, and an arm (87) which limits movement of the seat plate (702).

Claims 5-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent to DeKraker et al. disclose a chair control assembly having independently movable seat and back portions. U.S. patent to Udo et al.

Art Unit: 3634
